

MRO Products & Procurement Solutions Designed For Centrally Guided Purchasing Organizations

Tech Service Products is a stocking distributor of MRO supplies and non-destructive testing consumables and equipment. We implement process-oriented purchasing strategies at the location level with best in class people, products and processes. Our emphasis on getting to know the people we serve allows us to become local champions for centrally guided purchasing organizations.

- Consistent pricing across multiple locations
- Supply accountability through vending solutions
- Product alternative recommendations
- Product standardization to consolidate purchasing advantages
- Consolidation of buying to drive better pricing
- TSP Alliance Program

WE CURE PROBLEMS ASSOCIATED WITH:

- Current supplier apathy or indifference
- Long lead times
- Having employees leave work to pick up supplies
- Loss of control over supply costs due to branch buying decisions

FLEXIBILITY & FAST DECISION MAKING

We are large enough to deliver quality products to organizations across the nation, but nimble enough to respond quickly to unique customer needs and new processes. By empowering our account managers to make decisions, we ensure quick decision making and no red tape.

PROCESS ALIGNMENT

Tech Service Products has a long history of conforming to custom buying infrastructures. We have the discipline and the technical capabilities to operate within even the most specific processes.

LOCAL RELATIONSHIP DEVELOPMENT

We help close the gap between the corporate office and the local yard by developing personal relationships with local staff and managers. These relationships allow us to facilitate a powerful cultural change in the adoption of corporate standards.

MEASURABLE RESULTS

We implement buying programs that are designed to drive results for our customers. Measurement is invited and expected.
